Projects

Car service website

Created a fully-fledged working website from scratch where you can book a car service and can see your history of services, you can create an account and view more services.

[www.euautoworks.com](#)

Asset Tokenization

Created an asset token using solidity contracts (ERC20) which can be transferred and received through user on a local blockchain network.

Path Finding Visualizer

I built this application because I was fascinated by pathfinding algorithms, and I wanted to visualize them in action. I hope that you enjoy playing around with this visualization tool just as much as I enjoyed building it. [www.luvjeet.github.io/Path-Visualizer](#)
